01 — Product Overview

GLASSSKIN Mobile Application - Product Overview

Problem Statement

GLASSSKIN, a beauty and personal care e-commerce brand offering natural, toxin-free skincare and personal care products, currently operates without a dedicated mobile application. Customers must access the brand through web browsers, resulting in a suboptimal shopping experience that doesn't reflect the brand's premium, clean aesthetic. This limits customer engagement, retention, and sales conversion opportunities in an increasingly mobile-first commerce landscape.

Solution Summary

Develop a native/cross-platform React Native mobile application for GLASSSKIN that provides a seamless, visually appealing shopping experience. The app will feature product browsing, search, filtering, cart management, wishlist functionality, secure checkout with multiple payment options, order tracking, and push notifications for order updates and promotional content.

Target Audience

- Primary: Women aged 25-45 who value clean beauty, natural skincare, and premium personal care products
- Secondary: Beauty enthusiasts seeking toxin-free alternatives to conventional cosmetics
- Tertiary: Existing GLASSSKIN web customers looking for a more convenient shopping experience

Core Value Proposition

A premium mobile shopping experience that embodies GLASSSKIN's "clean beauty" ethos through a visually stunning glassmorphism design, making it easy for customers to discover, purchase, and track their favorite natural skincare and personal care products.

Measurable Success Goals

Goal	Metric	Target	Timeline
App Adoption	Number of app downloads	5,000 downloads	6 months post-launch
Conversion Rate	Purchases per active user	15% conversion rate	3 months post-launch
Customer Retention	30-day retention rate	40% retention	3 months post-launch
Average Order Value	Revenue per transaction	\$75+ AOV	Ongoing
User Engagement	Sessions per user per week	3.5 sessions	2 months post-launch

02 — Features & Requirements

Functional Requirements

Priority 1: Core E-commerce Features

Product Catalog & Discovery

- Display product listings with images, names, prices, and ratings
- Implement product detail pages with descriptions, ingredients, usage instructions, and reviews
- Enable product search with real-time filtering as user types
- Provide category-based browsing (Skincare, Hair Care, Body Care, etc.)
- Implement advanced filtering by price range, product type, skin type, and certifications

Shopping Cart & Wishlist

- Add/remove products to/from cart with quantity adjustment
- Persist cart items across sessions using Supabase
- Save products to wishlist for later purchase
- Display wishlist items with quick-add-to-cart functionality

User Authentication

- Email/password registration and login
- Social login via Google and Apple
- Password reset functionality
- Guest checkout option without mandatory account creation

Secure Checkout

- Multi-step checkout flow: shipping address, payment method, order review
- Support for credit/debit cards via Stripe integration
- Support for PayPal payments
- Apply promo codes and discounts
- Order confirmation with summary and next steps

Order Management

- View order history with status indicators
- Track order progress (Processing, Shipped, Delivered)
- Re-order previous purchases with one tap
- Cancel orders before shipment confirmation

Priority 2: Engagement Features

Push Notifications

- Order status updates (confirmation, processing, shipped, delivered)
- Promotional notifications for new products and sales
- Personalized recommendations based on purchase history
- Abandoned cart reminders

User Profile

- Personal information management (name, email, shipping addresses)
- Payment method storage and management
- Order history and tracking
- Wishlist management

Priority 3: Enhancement Features

Product Reviews & Ratings

- Submit product reviews with star ratings and text
- View aggregate ratings and individual reviews
- Photo upload capability for reviews
- Helpful/not helpful voting system

Search & Recommendations

- Intelligent search with autocomplete suggestions
- "Frequently bought together" recommendations
- "Customers also viewed" suggestions
- Personalized product recommendations

Analytics & Insights

- View personal purchase statistics
- Track spending over time
- Favorite categories and brands

03 — UI/UX Requirements

UI/UX Requirements

Design System

Color Palette

Element	Color	Usage
Primary	#3B82F6	Buttons, active states, highlights
Secondary	#64748B	Secondary actions, disabled states, icons
Accent	#06B6D4	Links, progress indicators, special badges
Background	#0F172A	Main app background, navigation bars
Surface	#1E293B	Cards, modals, input fields
Text	#F8FAFC	Primary text, headings, labels

Typography

- **Font**: Space Grotesk (System fallback: -apple-system, BlinkMacSystemFont, 'Segoe UI', Roboto, Oxygen, Ubuntu, Cantarell, sans-serif)
- **Font Weights**: Regular (400), Medium (500), Bold (700)
- **Type Scale**:
 - Display: 28px (Bold)
 - Headline: 24px (Bold)
 - Title: 20px (Medium)
 - Body: 16px (Regular)
 - Caption: 14px (Regular)
 - Overline: 12px (Medium)

Glassmorphism Implementation

- Background blur: 10-20px blur radius
- Transparency: 60-80% opacity
- Border: 1px solid with rgba(255,255,255,0.1)
- Backdrop filter: saturate(180%) blur(10px)

Core Screens

1. Onboarding Flow

- Welcome screen with brand messaging
- Feature highlights (3 screens max)
- Login/Signup prompt

2. Home Screen

- Sticky header with search bar
- Hero banner carousel for promotions
- Category quick-access grid
- Featured products section
- Newsletter signup section

3. Product Listing Screen

- Filter button with count badge
- Sort dropdown (Price: Low-High, High-Low, Newest, Rating)
- Grid view toggle (2-column, 4-column)
- Loading skeletons for performance

4. Product Detail Screen

- Image gallery with zoom capability
- Product title and price header
- Description and usage instructions
- Ingredients list with expandable sections
- Quantity selector and Add to Cart button
- Wishlist toggle

- Related products section

5. Cart Screen

- Empty state illustration
- Cart item cards with image, name, price, quantity
- Quantity adjustment with +/- buttons
- Item removal with confirmation
- Cart total and tax display
- Proceed to Checkout button

6. Wishlist Screen

- Empty state with illustration
- Product grid layout
- Quick view and add to cart options
- Remove from wishlist functionality

7. Checkout Flow (Multi-step)

- Step 1: Shipping Address (map integration for location)
- Step 2: Payment Method (saved cards, new card form, PayPal)
- Step 3: Order Review (items, totals, shipping, taxes)
- Progress indicator showing current step

8. Order Confirmation Screen

- Order number display
- Estimated delivery date
- Next steps information
- Continue shopping button

9. Order Tracking Screen

- Visual timeline of order status
- Shipment tracking information
- Estimated delivery countdown
- Contact support option

10. User Profile Screen

- Profile header with avatar and name
- Menu items: Orders, Wishlist, Addresses, Payment Methods, Settings, Logout
- Notification settings toggle
- App version display

11. Login/Signup Screens

- Email and password fields with validation
- Social login buttons (Google, Apple)
- Terms and conditions agreement
- Error state handling

Responsive Design

- Support for screen sizes: 320px (iPhone SE) to 430px (iPhone Pro Max)
- Adaptive layouts for portrait and landscape orientations
- Dynamic type scaling for accessibility
- Consistent 16px horizontal padding on all screens

Accessibility Requirements

- Minimum touch target size: 44x44px
- Color contrast ratio: 4.5:1 for normal text, 3:1 for large text
- VoiceOver/TalkBack support for all interactive elements
- Alternative text for all images
- Focus management for keyboard navigation
- Reduced motion option for animations

Motion & Interactions

- Smooth transitions between screens (300ms ease-in-out)
- Button press animations with ripple effects

- Pull-to-refresh functionality on scrollable lists
- Swipe-to-delete for cart items
- Haptic feedback for key interactions

```

Frontend Stack

Core Libraries

- **React Native**: 0.73+ (latest stable)
- **React Navigation**: v6.x with Stack and Tab navigators
- **TypeScript**: 5.x for type safety
- **Zustand**: State management (lightweight alternative to Redux)
- **React Hook Form**: Form validation and management
- **Yup**: Schema validation for forms

UI & Styling

- **NativeWind**: TailwindCSS for React Native
- **React Native SVG**: SVG icon support
- **React Native Fast Image**: Optimized image loading
- **React Native Gesture Handler**: Gesture-based interactions
- **React Native Reanimated**: Smooth animations

Device & Platform

- **Expo**: Development and build tooling
- **Expo Notifications**: Push notification handling
- **Expo Image Picker**: Product review image uploads
- **Expo SQLite**: Local caching for offline support

Backend Stack (Supabase)

Database Schema

```
``sql
-- Users table
CREATE TABLE users (
  id UUID PRIMARY KEY DEFAULT uuid_generate_v4(),
  email TEXT UNIQUE NOT NULL,
  full_name TEXT,
```

```

phone TEXT,
created_at TIMESTAMP DEFAULT NOW(),
updated_at TIMESTAMP DEFAULT NOW()
);
-- Products table
CREATE TABLE products (
  id UUID PRIMARY KEY DEFAULT uuid_generate_v4(),
  name TEXT NOT NULL,
  slug TEXT UNIQUE NOT NULL,
  description TEXT,
  price DECIMAL(10,2) NOT NULL,
  compare_at_price DECIMAL(10,2),
  category TEXT,
  tags TEXT[],
  images TEXT[],
  stock_quantity INTEGER DEFAULT 0,
  rating DECIMAL(3,2) DEFAULT 0,
  review_count INTEGER DEFAULT 0,
  created_at TIMESTAMP DEFAULT NOW(),
  updated_at TIMESTAMP DEFAULT NOW()
);
-- Cart items table
CREATE TABLE cart_items (
  id UUID PRIMARY KEY DEFAULT uuid_generate_v4(),
  user_id UUID REFERENCES users(id),
  product_id UUID REFERENCES products(id),
  quantity INTEGER NOT NULL DEFAULT 1,
  created_at TIMESTAMP DEFAULT NOW()
);
-- Wishlist table

  quantity INTEGER NOT NULL,

```

```

    created_at TIMESTAMP DEFAULT NOW()
);
-- Reviews table
CREATE TABLE reviews (
  id UUID PRIMARY KEY DEFAULT uuid_generate_v4(),
  user_id UUID REFERENCES users(id),
  product_id UUID REFERENCES products(id),
  rating INTEGER CHECK (rating >= 1 AND rating <= 5),
  comment TEXT,
  images TEXT[],
  helpful_count INTEGER DEFAULT 0,
  created_at TIMESTAMP DEFAULT NOW()
);

```

Key API Endpoints (Supabase Functions)

- `POST /api/auth/signup` - User registration
- `POST /api/auth/login` - User authentication
- `GET /api/products` - Fetch products with filtering and pagination
- `GET /api/products/{id}` - Fetch single product
- `POST /api/cart` - Add item to cart
- `GET /api/cart` - Get user cart
- `POST /api/checkout` - Create order and process payment
- `GET /api/orders` - Get user orders
- `GET /api/orders/{id}` - Get order details

Supabase Services

- **Authentication**: Email/password and OAuth providers
- **Database**: PostgreSQL with Row Level Security
- **Storage**: Product images and user-generated content
- **Functions**: Edge functions for checkout processing
- **Realtime**: Order status updates via Realtime channels

External Integrations

Payment Processing

- **Stripe**: Credit/debit card processing
- **PayPal**: Alternative payment method
- Webhook handling for payment status updates

Push Notifications

- **Expo Notifications**: Cross-platform notification service
- Firebase Cloud Messaging (FCM) for Android
- Apple Push Notification Service (APNs) for iOS

Analytics

- **Expo Analytics**: Built-in analytics tracking
- **Sentry**: Error tracking and performance monitoring

Development Environment

Local Development

- **Node.js**: 18.x LTS
- **Yarn**: Package manager
- **Expo CLI**: Development server
- **Supabase CLI**: Local development environment
- **VS Code**: Recommended IDE with React Native extensions

Testing Strategy

- **Jest**: Unit testing for utilities and hooks
- **React Native Testing Library**: Component testing
- **Detox**: End-to-end testing for critical flows
- **ESLint**: Code quality and consistency

Build & Deployment

- ****Expo Application Services (EAS)****: Build and submit to app stores
- ****GitHub Actions****: CI/CD pipeline
- ****App Store Connect****: iOS distribution
- ****Google Play Console****: Android distribution

Performance Requirements

- Initial load time: < 3 seconds on 4G
- Image loading: < 2 seconds with placeholder
- API response time: < 500ms for read operations
- Offline support: 7-day cache for product catalog
- Memory usage: < 200MB during normal operation

Security Requirements

- All API communications over HTTPS
- JWT tokens for authentication with 24-hour expiry
- Row Level Security policies in Supabase
- Input validation and sanitization
- PCI-DSS compliance for payment processing
- Secure storage for sensitive user data
